

# Develop an appreciation for the challenges that lie ahead for those with facial deformity and explore advances in reconstructive surgery

Using his own patients' clinical photos and personal stories, Dr. Jeffrey Posnick takes readers through surgical thinking and describes current techniques that are used for facial reconstruction in children with conditions such as craniosynostosis, skull defects, congenital tumors, cleft lip and palate, and developmental and posttraumatic jaw, nasal, and ear deformities.

- **Discussions of surgical techniques** are included in each chapter, highlighting treatment plans and aftercare.
- **Patient-focused approach in each chapter** presents specific patient examples along with associated clinical information, photos, and feedback from those who have been treated.
- **300 full-color clinical photos and illustrations** visually reinforce essential concepts and procedures.
- **Clinical guidelines** are presented with concise and up-to-date ideas.
- **Focus on a team approach** facilitates the inclusion of dentists, medical doctors, speech pathologists, and nurses in the treatment of facial deformities in children.
- **An eBook version**, included with print purchase, allows readers to access all the text, figures, and references, and offers the ability to search, customize content, make notes and highlights, and have content read aloud.
- **Internationally known author**, Jeffrey C. Posnick, is also a clinician, educator, and lecturer, and has written more than 400 articles for medical journals and book chapters, as well as the two-volume textbook *Orthognathic Surgery*. He holds the rank of Professor at four prominent universities.
